## SUMMARY

Software development student and experienced professional with over 10 years of team-based work experience and a strong background in audio production and technical problem-solving. Currently training in full-stack development through LaunchCode, with hands-on experience building JavaScript and React applications. Seeking an entry-level software development role where I can apply my technical skills, collaborate on meaningful projects, and continue growing as a developer.

## LANGUAGES | FRAMEWORKS | TOOLS

**Languages:** Java, JavaScript, HTML, CSS

**Tools:** MySQL Workbench, Git, GitHub, Pro Tools, Adobe Audition, Adobe Premiere Pro

**Frameworks:** React, Spring Boot, Django

## EXPERIENCE

### Project Name — Punk Pad Capstone -Songwriting Web Application

- Developed a web application that allows users to generate, save, and customize punk-style chord progressions
- Designed a virtual guitar stomp-pedal interface with a transport window for tempo and playback control
- Built responsive layouts with HTML and CSS to clearly separate controls, data, and output
